EU - Latin America and the Caribbean (LAC) Dialogues

About the dialogues

Accelerating the transition towards sustainable food systems and sustainable agricultural production is a commitment of the international community that calls for strategic partnerships. It is in this context, that European Union (EU)-Latin America and the Caribbean (LAC) Dialogues on Sustainable Food Systems are organised, aiming to promote a constructive exchange of ideas to find common grounds, principles, and initiatives that can pave the way for collaboration to push food systems towards sustainability.

These Dialogues are organised with the support of the Foreign Policy Instruments (FPI) and the EU-Lac Policy Dialogue Facility. They will consist of a total of four sub-regional workshops, and concluding with a bi-regional conference expected to take place at the end of 2022.

**BUILDING FAIR
HEALTHY AND
SUSTAINABLE FOOD
SYSTEMS TOGETHER**

*Benefitting farmers, consumers
and the environment*

**EU, MERCOSUR
countries and
Chile**

*Policy Dialogues on
Sustainable Food Systems
and Sustainable Agriculture*

Policy makers from the EU, MERCOSUR countries and Chile engaged in a dialogue on how to work together in the global transition towards more sustainable agri-food systems. From this dialogue, a series of regulatory and non-regulatory measures have been proposed for the entire value chain to improve its sustainability at every stage, from production to consumption. This will enable more efficient climate systems, healthy food for consumers and a decent life for farmers and fishermen.
